

Since XM is a pay service, I do not see why 'free' AM/FM stations are pushing to remove the local traffic and weather XM programming. By paying XM, I should have a right to receive whatever programming I see fit. If it were free, maybe a different story. Overall, I find this service to be very convenient, as they run much more useful information than what I get on local stations. It would be a travesty to force this programming to be removed. Please do the right thing; Leave the programming alone for the sake of those who spend the money to receive the programming they want.

Sincerely,
